Commissioner for Patents  
 P. O. Box 1450  
 Alexandria, Virginia  
 22313-1450

Sir:

Pursuant to 37 C.F.R. § 1.97-1.98, Applicants hereby submit documents identified in the enclosed form PTO-1449. These documents were previously of record in the parent application, Serial No. 10/131,859. Applicants are also submitting herewith a copy of the Information Disclosure Statement filed under 37 C.F.R. § 1.97, mailed on November 25, 2002, that was submitted in such parent application. Applicants request that the aforesaid materials be considered in the examination of the above-identified patent application.

Please charge any fees required to Deposit Account No. 01-0528.

Respectfully submitted,

  
 Thomas E. Nemo

Commissioner for Patents  
Washington, D.C. 20231

Sir:

Enclosed herewith is an Information Disclosure Citation on Form PTO-1449 along with the cited documents. Applicants request the Examiner to consider these documents in the prosecution of the above-captioned application. Additionally, Applicants respectfully request the Examiner to consider the information provided below in the prosecution of the above-captioned application.

1. In 1990, one of Applicants' assignee's predecessor companies demonstrated to US automobile companies a partially transparent solar sunroof designed for automobiles. The sunroof was made from an amorphous silicon solar module where part of the rear metal contact was removed by laser ablation. In these modules, the rear metal contact was removed in separated holes or dots. There was no disclosure of the process and the demonstrations were done under a confidentiality agreement.
  
2. As part of a demonstration test, partially transparent, amorphous silicon solar modules, where the partial transparency, in the form of rows of lines of connected holes, was provided by laser ablation were sold for installation at a US university. Price quotes for the modules for this

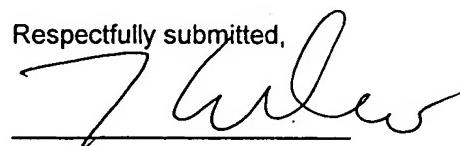

**ANY ADDITIONAL FEES REQUIRED  
CHARGE TO DEPOSIT ACCOUNT  
NO. 01-0528**

demonstration test were made on August 16, 1999. Invoices for the modules are dated May, 2001.

3. Applicants are not, by making the statements in 1 and 2 above, stating or implying that there are no differences between the modules described in 1 and 2 above and embodiments disclosed in the instant patent application.
4. Descriptions of partially transparent, amorphous silicon solar modules, where the partial transparency is provided by laser ablation of the rear metal contact, appear in monthly progress reports of the Department of Energy's "PV Bonus Two Phase 2 Program". One of Applicants' assignee's predecessor companies was involved with such program, which was in 1998. The undersigned does not have copies of such reports.

If the Examiner has any questions regarding any of the information contained herein, the Examiner is respectfully requested to contact the undersigned.

Respectfully submitted,

Thomas E. Nemo
